## **DETAILED ACTION**

### ***Drawings***

The drawings submitted on September 22, 2005 are acceptable.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Horiuchi et al. (5,737,191).

As to claim 34, Horiuchi et al. teach attaching a die 12 to a substrate 10. A thermally conductive heat spreader 34 is placed over the die 12. A molten metal material 24 is interposed between the heat spreader and the die, and the material substantially fills the gap between the heat spreader and the die. See figure 6.

As to claim 39, Horiuchi et al. teach underfilling the space between the die and the substrate. See figure 6.

### ***Allowable Subject Matter***

Claims 35-37 and 40-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims. (Claim 38 is dependent upon claim 37).

//

Claims 18-33 and 42-59 are allowed.

The following is a statement of reasons for the indication of allowable subject matter. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a method of making a device with a heat spreader, particularly characterized by flowing a molten material between a heat spreader and a die using a mold, as recited in claim 18, 42, 58 and 59.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Geyer whose telephone number is (571) 272-1958. The examiner can normally be reached on weekdays, between 10:00am - 6:30pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Lebentritt can be reached on (571) 272-1873. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
